Food Service Establishment Plan Review

Plan review by the Health Department is required by the Michigan Food Code for the new construction or remodeling of all new or existing food establishments. Plan review fees cover plan review, one consultation site visit, and one pre-opening inspection. Any additional work (for example, altered plan review, addendum review, additional on-site consultation or visit, or additional pre-opening inspection) that may be requested or required will be charged at the rate of \$85 per hour.

Food Service Establishment License Renewal

Renewal license applications are due on April 30th of each year. There will be a \$125 late filing fee for applications received after April 30th of each year. Applicants will be notified by certified mail if their applications were received after the deadline. Follow-up inspection fees accumulated during the year will be added to the annual license fee. All license and follow-up fees must be paid by April 30th of each year.

Complaint Resolution Reimbursement

Complaint Resolution Reimbursement – Expenses incurred by the health department to resolve a complaint when the property owner fails to comply with a correction order will be billed to the property owner. For example, expenses associated with plugging a direct discharge will be billed. Unpaid bills will be referred to a collection agency.

Photocopy Policy

It is the policy of the Western U.P. Health Department to charge moderate fees for duplicating public records. Those fees are designed to cover the agency’s costs of producing and copying the material, in accordance with the FOIA (Freedom of Information Act), and the agency’s commitment to making public information accessible.

Fees for producing and copying records and documents for requesting parties outside the health department’s employment will be based on the formula below. This applies to all records, whether produced to satisfy a subpoena, FOIA request or for Environmental Health purposes. Requests for material under the FOIA must be in writing.

The fee for producing and duplicating records will be calculated using these elements:

1. Actual mailing costs;
2. Incremental cost of duplication or publication, to include:
 - The cost of labor incurred in duplication, mailing, search, review, examination and separation will be charged. The cost will be based on the hourly wage of the lowest paid employee who is capable of retrieving the information, multiplied by the actual time spent.
 - Actual copy cost multiplied by the number of pages copied, calculated at \$.10 per page.

An invoice detailing the above components will be sent with the records requested
